Pink Area is Bleed area

Black area is the Cut off for the 3"x3" note

Blue area is the IMAGE AREA. All Type, art, etc that does not bleed must be within this 2.75"x2.75" square in order to not be cut off.

Crop marks are a good idea if you have a full bleed note - that way we know where you expect the note to be cropped.

The same thing applies to Die cuts - if you are expecting it to bleed off the edge, it must be set up with an 1/8" bleed all around. Safe type area is 1/8" within the die cut. Call us for templates

Example of wrong way to bleed to edge

See how the type is right to the edge of the 3"x3"?

It needs to be within the blue border.

The right way

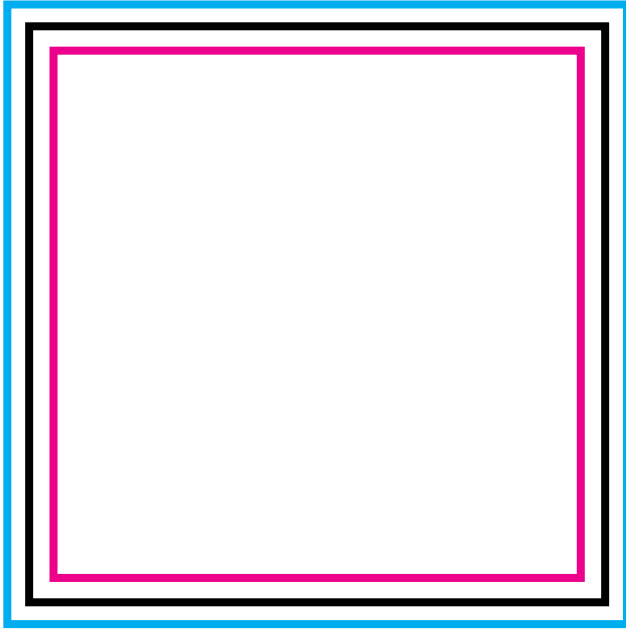

Everything pertaining to type is within the image area.
